

StepSept™ Products

The Right Step to Help Control Lameness!

StepSept™ CSE-200 Concentrated Hoof Bath Enhancer

- Dramatically improves the effectiveness of conventional hoofbath solutions
- Cuts copper sulfate, zinc sulfate or formaldehyde usage in HALF!
- Save money while reducing the use of heavy metal solutions

Features and Benefits

- Acidifies the solution, which creates a germicidal effect on hoof pathogens more potent than copper sulfate
- 3rd generation quaternary ammonium chloride provides more killing power than copper sulfate
- Includes surfactants that help penetrate hard-to-reach areas of the hoof - where infections begin - much better than copper sulfate
- pH buffered to resist neutralizing effect of organic matter
- Solution works longer and treats more cows per gallon than copper sulfate

ORDER INFORMATION

5 gal.	8524070
15 gal.	8523733
55 gal.	8523734

2 plus 2 CAN equal 5. It's called synergy, and StepSept CSE-200 has it!

StepSept™ CSE-200 =

- More effective hoof bath solution
- Substantial cost savings over copper sulfate alone
- A more environmentally friendly hoof bath solution

StepSept™ PB-50 Pre-Bath Hoof Cleaner

- Helps reduce bacterial hoof infections
- Highly concentrated
- High detergent level with penetrating surfactants

Use Two Ways

- 1) As a pre-treatment hoofbath solution before the hoofbath treatment solution
- 2) Or, daily to improve and maintain hoof health hygiene

Features and Benefits

- Loosens the grip of filth and soil on the hoof
- Debris drops off the hoof before the cow enters the main treatment hoofbath
- Cows enter the treatment hoofbath cleaner and respond better to treatment
- Less contamination helps extend the life of the footbath solution. Save money with more cows per bath

StepSept PB-50 Provides Superior Hoof Cleaning

StepSept™ FB -T100 Concentrated Topical Hoof Treatment

Use Two Ways

1) As a Topical Treatment

- Use at full strength for the prevention and treatment of foot rot, hairy foot warts and other bacterial or fungal infections of the hoof
- Excels at treating and reducing lameness due to bacterial infections
- Provides a "one-two punch" of acidified copper sulfate with a secondary germicide
- pH buffered to resist the neutralizing effect of organic matter
- Deep, penetrating, antibacterial formula gets to the source of infections with concentrated strength, and less waste than a hoofbath solution
- Apply with a typical, garden-variety pump sprayer or spray bottle

ORDER INFORMATION

2.5 gal. sprayer	5100225
4x1 gal.	8523729
15 gal.	8523730
55 gal.	8523731

2) As a Footbath

- Helps maintain hoof health in herds with a low incidence of lameness
- No additives are required when *StepSept FB-T100* is used at one gallon per 49 gallons of water as a hoofbath solution

StepSept™ pH Down Concentrated Hoof Bath Acidifier

Features and Benefits:

- **Saves money** by reducing copper sulfate use
- **Environmentally friendly** non-toxic and non-hazardous
- **Improves treatment efficacy** and hoof health
- Enhanced copper sulfate efficacy by **lowering pH significantly**
- **Unique new technology** formula keeps pH below 4 even in heavy soil loads
- Can handle **up to 500 cows** before footbath change is required
- *StepSept pH Down* **kills bacteria** which cause most common hoof diseases
- Acidification can **reduce copper sulfate use by 50%** or more while maintaining efficacy

**Saves Money.
Kills More
Bacteria.
Lasts Longer!**

StepRight™ Natural Rubber Flooring

Leading the Way to Ultimate Cow Comfort and Productivity

Why Rubber Flooring?

Rubber flooring has been proven to be better than bare concrete floors at reducing lameness problems and herd cull rates. Natural rubber flooring increases cow comfort and milk production while also improving skid resistance and heat detection.

- *StepRight* reduces hoof health and lameness problems
- *StepRight* provides greater cow comfort and increased milk production

StepRight natural rubber flooring is an important part of BouMatic's complete hoof health program. Together with *BouMatic's StepGuardian* hoof bath and *StepSept* hoof bath solutions, *StepRight* natural rubber flooring provides unsurpassed cow comfort and hoof health. This means increased milk production and reduced losses from hoof problems and lameness on your dairy.

The Advantages of *StepRight* Natural Rubber Flooring, Exclusively from *BouMatic*:

- Made from natural rubber which is proven superior to other recycled rubber flooring products
- Natural rubber flooring is a monolithic, closed-seam flooring that eliminates all but a few anchors
- Non-absorbent and urine resistant with a skid resistant surface
- More resilient and will not flatten over time
- Static free and electrically resistant
- **New - *StepRight CX*** - controlled expansion
- **New - *StepRight CX Diamond Tread*** - controlled expansion and extra traction surface

StepRight™ CX

StepRight CX is a controlled expansion, natural rubber flooring for dairy cows that's easy to install and increases cow comfort.

Unique Features of StepRight CX

- Integrated nylon fiber component in the rubber compound limits expansion and contraction. There's less stretch and deterioration common with other rubber flooring.
- Limited expansion and contraction means fewer anchors required. Just set it and forget it.
- Diamond Grip or Hammer Top embossed provides best traction.
- Non-absorbent and more urine resistant.
- Available in rolls and mats.

StepRight™ CX & StepRight™ CX Diamond Tread Controlled Expansion, Natural Rubber Flooring

- Available in 5/8 in. thick rolls 2-, 3-, 4-, 5- and 6-ft. widths by 100 ft. long rolls
- Available in 3/4 in. thick 4 ft. x 6 ft. mats with straight or interlocking edges
- Can be custom cut to match rotary parlor stalls or for custom-fit pens
- New Diamond Tread pattern available in 4- and 5-ft. by 100 ft. rolls, for extra traction in extreme situations
